

15<sup>th</sup> April: Today, I heard explanation from my supervisor about my practice at SickKids, and it was determined that I was mainly supposed to help the research of Dr.Sakuma and join conferences in clinical neurophysiology laboratory. In the evening, we joined Journal club. That is the opportunity for residents or fellows to read important article in the major journal together and discuss about it

16<sup>th</sup> April: In the morning, I had Pathology teaching and after that, Dr.Halliday, professor of neuropathology, showed me slides about neuropathology. In the afternoon, I started my research, and I had Neuroscience Rounds in the evening.

17<sup>th</sup> April: In this morning, I had Dr.Halliday's lecture and he showed a lot of cases and seizure conference, which is a big conference. It was a good opportunity to know about epilepsy patients, and hear many medical English words.

18<sup>th</sup> April: In this morning, I could observe the Brain Cutting to make slide of neuropathology and after that Dr.Otsubo, the director of clinical neurophysiology laboratory taught me how to make a presentation. In the afternoon, we had a presurgical meeting for tomorrow's surgery.

19<sup>th</sup> April: This morning, I observed epileptic surgery and in the afternoon I did research. I counted the number of cell as usual.

22<sup>th</sup> April: This morning, I attend the orientation of SickKids, and in the afternoon I had Dr.Halliday's lecture and did research.

23<sup>th</sup> April: This morning, I had Pathology Rounds, and in the afternoon, we had the rehearsal of Prichard's day, and after that Neuroscience Rounds.

24<sup>th</sup> April: I had Dr.halliday's lecture, Seizure conference, and joined in the NICU conference.

25<sup>th</sup> April: I had a conference in the morning, and did research in the afternoon.

26<sup>th</sup> April: Today was Prichard's day, which was a big conference that fellows presented their research all day, and after that we had the Party at Mr. Prichard's house.

29<sup>th</sup> April: In the afternoon, I had epilepsy conference and I continued to research.

30<sup>th</sup> April: This morning, I had EEG seminar, and after that I did research.

1<sup>st</sup> May: I had Neurology Grand Rounds, and Seizure conference, and did research.

2<sup>nd</sup> May: I finished to count the number of cell in my research, so started to another analysis, and read EEG with Dr.Ochi.

3<sup>rd</sup> May: I did research in this morning, and in this afternoon read EEG with Dr.Ochi

6<sup>th</sup> May: Today, I observed the surgery of hemimegalencephaly, and did research.

7<sup>th</sup> May: Today, I was absent because my condition was bad.

8<sup>th</sup> May: I did research and joined in the Seizure conference, and observed teenager's clinic.

9<sup>th</sup> May: This morning, I did research and had Dr.Halliday's lecture, and in the afternoon observed the epileptic clinic.

10<sup>th</sup> May: Today was the final day. Today, I tried to finish my work in my research, had a meeting and lecture in clinical neurophysiology laboratory, and had CPC in the division of pathology
